How do you plan to be successful as a Political Science student at UC San Diego?

I plan to track my major requirements and pick courses that will best suit my future plans, as well as take opportunities within my major to gain more experience with my intended career path.

I plan to take advantage of resources and take a number of diverse classes to widen my range of political knowledge.

A big part of my plan to become a successful political science student is checking emails, reaching out to department for help, and being organized and proactive,

I can't wait to explore the on-campus resources and opportunities at UCSD and take a plethora of courses related to Political Science. I'm also very interested in participating in a foreign exchange program.

I will make sure to participate in a variety of clubs, courses, and additional Programs.

I plan to be successful as a Political Science student at UC San Diego by taking advantage of the resources and opportunities I have available both on campus and off campus. My hope is that I can enrich my understanding of the field through classes, with peers, and in internships and other opportunities.

Attend all my classes, ask for help from professors when I need it, make connections with students and professors

In order to be a successful Political Science student at UC San Diego I plan to maintain a healthy balance between my social life and academic one, but just as well actively participate and interact with related clubs, internships, volunteer opportunities, etc. related to my major to better gain knowledge and further develop my overall preparedness.

I will create a 2 year plan so I know what classes I need to take each quarter and I plan to join organizations that will support my journey in political science.

I plan to be successful as a political science student at UC San Diego by using the resources available to me or reaching out for support when needed. As a first-generation student, the process of getting to this point of my life has been difficult. I've always found a way to figure things out on my own but there's some things I can't overcome by myself and I want to work on asking to better my learning experience.

Molly Roberts

Her research interests lie in the intersection of political methodology and the politics of information, with a specific focus on methods of automated content analysis and the politics of censorship in China

Thad Kousser

He studies American state and national politics, government reform, direct democracy, interest group influence, and how politicians use social media

Marisa Abrajano

Her research is in the field of American politics, particularly in the areas of campaigns, mass electoral behavior, and race/ethnic politics.

The attributes employers most seek on a candidate's resume:

1. Leadership
2. Ability to work in a team
3. Written communication skills
4. Verbal communication skills
5. Problem solving and critical thinking skills
6. Strong work ethic

Transferable skills inside the classroom: Ability to communicate, methods and research (interpret and analyze data); analytical abilities (analyze and solve problems systemically and strategically); planning and development (conceptualize problems and demonstrate leadership); group skills (ability to work in a team) *Source: APSA Careers and the Study of Political Science
